

EB Target Volatility 4

This internal branch 23 investment fund is marketed by Allianz Benelux SA/NV in the group insurances. Your payments are converted into units of the fund and are assigned to the contract.

INVESTMENT POLICY

The assets of the internal investment fund are 100% invested in the sub-fund **Allianz Strategy 15** of the open-ended investment company with variable share capital (SICAV) **Allianz European Pension Investments**, organised under the laws of Luxembourg. The sub-fund invests to a variable extent in international equity markets and in the market for euro bonds. Applying a quantitative approach, management lowers the investment in stocks in phases of high market volatility and raises it in phases of low volatility. Overall, it strives to achieve a return that is comparable to the return of a mixed portfolio investing 15% in international stocks and 85% in medium-term euro bonds.

SUMMARY RISK INDICATOR (SRI)

RECOMMENDED HOLDING PERIOD

3 years

Launch date

15/12/2015

The summary risk indicator is a guide to the level of risk of this Fund compared to other products. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you. The sub-fund invests in financial markets and uses techniques and instruments which are subject to fluctuations, which can result in gains or losses.

Due to the stock portion in the sub-fund, depreciations are possible. In periods of rising interest rates, interest fluctuations can also cause depreciations of the bonds.

MORNINGSTAR RATING™

EB Target Volatility 4

Rating on a scale from 1 to 5 on 31/08/2024. Morningstar evaluates the investment funds based on a weighted average of the returns over a period of 3, 5 and 10 years. The investment funds are then ordered within their Morningstar categories by risk/return ratio. The top 10% are awarded 5 stars, the bottom 10% gets 1 star. Also see the "© 2023 Morningstar, Inc." footnote at the bottom of the last page of this report.

¹ The costs that are charged directly to the fund are included in the net asset value (NAV) and in the return. These are gross performances that do not take account of front-load and back-load fees or the premium tax that is charged to the contract. This past performances are not a reliable indicator for future performances.

* These indicators and other financial terms are explained in our glossary.

PORTFOLIO STRUCTURE OF THE UNDERLYING FUND

Sector breakdown (%)

Top holdings (% Market Value)

Geographical breakdown

ASSETS

- + Steady interest income on bonds, capital gains opportunities on declining interest rates.
- + High return potential of stocks in the long run.
- + Broad diversification across numerous securities.
